

RE: Roark Tools Canada- Recommendation Letter.

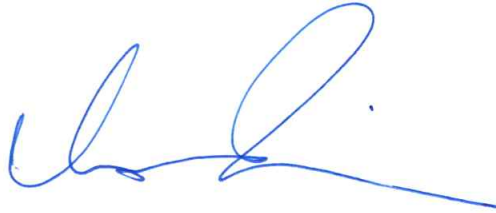

To Whom It May Concern:

With confidence I recommend Roark Tools Canada to you regarding any of your Industrial Bolting needs. We gave Roark Tools and opportunity this year and purchased some of their tools. After years of trying many different brands we found many of which could not keep up with the workload we required in our shop. Since purchase we have been thoroughly impressed with Roark tools performance, as it has increased the productivity in the shop. As our budget permits we look forward to expanding our tool crib inventory with more quality Roark Tools.

Roark Tools has been professional and prompt during the sale process making my life easier. I seriously suggest you consider using Roark for your next project.

Sincerely,

Isaac Terrico
